

Get started!

HydroJar 

Instruction movie!

1. Get the following items:

1pc

Rubber band

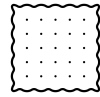

8,5cm

Glass Jar

Measuring spoon

Piece of paper
or fabric

2. Fill with water, nutrients & add growing plug

Put one growing plug in the basket with the open side up. wait for 5 min before sowing seeds.

Dosage nutrition :

0-4 weeks: 0,5 ml/ 0.5g nutrients / l

4+ weeks: 1ml/ 1g nutrients/ l

3. Wrap your jar

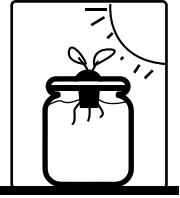

Wrap your jar with a thick piece of paper or fabric and secure with a rubber band. This is to prevent algae growth. Make sure it is tight!

4. Sow seeds

Sow 1/3 of the seeds from the included seed bag on top of the growing plug. Flatten lightly.

5. Place at a sunny window

Keep the growing plug moist with a high water level for the first 4 weeks. Use growing light between October- March if you are growing in Sweden.

6. Let it sprout!

Make sure to leave a gap of air between the growing plug & water surface after 4 weeks.

Fill up with nutrients (1g/l) & water when necessary.

Do you need a refillkit?

Do you need to stock up on growing plugs, seeds or nutrition?

Simply scan the QR-code and order from the website

What we stand for!

We see cultivation as one of our most important cultural heritages and a craft that we must pass on to the next generation. With a simple and accessible growing kit, we hope that you also will be able to experience the feeling and luxury of harvesting your own herbs.

Through love to nature, cultivation and innovation, we want to contribute to making the world a more circular place for future generations.
